The Problem

Current Café Limitations

"In a crowded market, generic photos don't stop the scroll. Many cafes fail to capture the texture and vibe that drive new customers to visit"

Our Solution

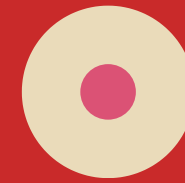

Cinematic Storytelling. We use professional **Sony A7IV** optics to make your food look irresistible and **DJI Drone** footage to showcase your unique locations

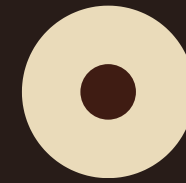

Product Snapshot

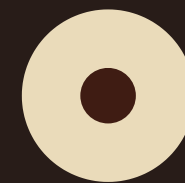

Cinematic Depth

Using 85mm lenses to create that professional "blurred background" look.

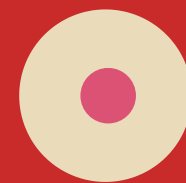

Sound Design

Adding immersive audio (the crunch, the pour) to create ASMR-style Reels.

Color Grading

Every clip is manually adjusted so the food colors look fresh and appetizing.

Aerial Views

Using the DJI Mini SE2 to show the café's exterior and North Cyprus surroundings.

Roadmap Growth Plan

Week 1 (Production)

High-intensity batch shooting at both locations (4-5 hours each)

Week 2 (Post-Production)

Professional editing, color grading, and sound syncing.

Week 3 (Delivery)

All 48+ pieces of content delivered for the month ahead.

- **Your Content Investment.**
